PROFESSIONAL SUMMARY

IT Consultant with experience since 2022 across IT Governance, IT Compliance, Enterprise Architecture, IT Assessment, and Quality Assurance, supporting enterprise-scale projects for government institutions, state-owned enterprises (BUMN/BUMD), and private-sector clients across logistics, finance, and technology industries. Skilled in IT governance and maturity assessments using COBIT 5 and COBIT 2019, Enterprise Architecture using TOGAF, and IT service/security management standards (ISO 20000, ISO 27001, ISO 22301). Combines hands-on QA testing experience with governance and strategic advisory work, with a growing focus on Cybersecurity.

CORE SKILLS

IT Consulting & Frameworks: COBIT 5, COBIT 2019, TOGAF, ISO 20000, ISO 27001, ISO 22301, ITIL, IT Governance, IT Strategic Planning, IT Maturity Assessment, IT Master Plan, Enterprise Architecture, Standards and Procedures; IT Risk and Compliance

Quality Assurance & Testing: Test Planning & Strategy, Test Case Design, Functional/Regression/UAT Testing, Requirement Analysis, Defect Management, Technical Documentation

Tools & Technologies: Atlassian Jira, Microsoft Office

Other: Technical Writing (Penetration Testing Reports), Cross-functional Collaboration, Stakeholder Management, Requirements Analysis

WORK EXPERIENCE

IBM Delivery Indonesia *Jakarta, Indonesia*

Solution Consultant – Hybrid Cloud & Data Service Line *May 2025 – Present*

Serving as a Solution Consultant at IBM, contributing to enterprise-scale technology and consulting projects across government and state-owned enterprise (BUMN/BUMD) sectors. My experience spans IT Governance, Enterprise Architecture, Quality Assurance, and technical documentation, enabling me to collaborate across teams and contribute to different stages of the project lifecycle, from requirements analysis and solution design to testing, documentation, and deployment support.

Key Responsibilities and Contributions

- Reviewed requirement specifications and design documents to ensure clarity and testability
- Created detailed, well-structured test cases aligned with project objectives and executed test scripts to identify discrepancies and ensure product quality
- Documented and reported technical issues clearly to support timely resolution
- Collaborated with developers to design effective testing strategies and robust test plans that enhanced system reliability
- Prepare and maintain Functional Specification Documents (FSD), Technical Specification Documents (TSD), Solution Design Documents (SDD), and other project documentation
- Conducted IT Governance Assessments and IT Maturity evaluations using COBIT to align IT processes with organizational objectives and regulatory requirements
- Applied TOGAF principles to support Enterprise Architecture initiatives, analyzing business, application, data, and technology layers
- Contributed to developing governance frameworks and control mechanisms to strengthen IT process maturity in government and BUMN environments
- Provided recommendations to align IT governance practices with ISO standards
- Develop IT policies, Standard Operating Procedures (SOPs), and governance documents aligned with applicable frameworks, standards, and organizational requirements.
- Served as Technical Writer for Penetration Testing (Pentest) activities, producing clear and actionable technical reports

PT Equine Global *Jakarta, Indonesia*

Jul 2022 – May 2025

Security & Cloud Staff *Mar 2024 – May 2025*

Worked as a Security and Cloud Staff, contributing to software quality assurance and technical documentation across security testing and software testing projects. My responsibilities focused on functional testing, test documentation, reporting, and deliverable tracking, while collaborating with technical teams to support project quality and delivery objectives.

Key Responsibilities and Contributions

- Prepared penetration testing reports and maintained deliverable tracking
- Created and executed test scenarios to validate application functionality against business requirements and expected results
- Developed test scenarios for System Integration Testing (SIT) and User Acceptance Testing (UAT), documented test results, and supported testing activities to verify system readiness
- Performed regression testing to validate existing functionality after changes and identify potential issues
- Documented testing outcomes, identified discrepancies, prepared test reports, and tracked issues to support resolution and follow-up
- Reviewed requirement specifications and design documents to ensure clarity, consistency, and testability
- Worked with developers and project stakeholders to clarify requirements, communicate findings, and support testing and documentation deliverables

Junior Strategic Consultant *Feb 2023 – Apr 2024*

Worked as an IT Consultant supporting IT Governance, IT Maturity Assessment, IT Strategic Planning, IT Master Plan and Enterprise Architecture initiatives across various industries. Applied COBIT 5 and COBIT 2019 frameworks to assess IT capabilities, identify gaps, and develop recommendations aligned with business objectives and regulatory requirements.

Key Responsibilities and Contributions

- Supported IT Maturity Assessments, evaluated governance practices, identified gaps, and developed improvement recommendations based on COBIT 5 and COBIT 2019
- Contributed to IT strategic planning initiatives to align technology capabilities, business processes, and organizational objectives
- Supported Enterprise Architecture (EA) and IT Master Plan (ITMP) initiatives to align business, application, data, and technology perspectives
- Analyzed existing processes and documentation, identified gaps against assessment criteria, and supported the development of recommendations and corrective actions
- Supported IT management certification initiatives (ISO 27001, ISO 22301, ISO 20000) across logistics, finance, and technology industries
- Collaborated with project teams and client stakeholders across governance, architecture, risk, and compliance activities to support project deliverables and organizational improvement objectives
- Prepared, reviewed, & refined IT policies, SOPs, & supporting documents in accordance with applicable frameworks, standards, organizational requirements

Quality Assurance Consultant *Aug 2022 – Dec 2023*

Worked as a Quality Assurance Consultant, supporting software quality assurance activities across multiple projects. Experienced in developing test strategies, test plans, and test cases, as well as conducting functional, regression, and user acceptance testing (UAT) to validate system functionality against business requirements. Documented defects, reported discrepancies, and collaborated with development teams to support issue resolution and ensure alignment with project requirements.

Key Responsibilities and Contributions

- Developed and executed test strategies, plans, and cases including functional, regression, and user acceptance testing (UAT)
- Validated application functionality, identified discrepancies, and verified system behavior following changes
- Supported user acceptance testing and validated system functionality against business requirements and project documentation
- Reported defects and ensured documentation compliance to support project implementation
- Contributed to change management activities for an ERP Finance System implementation project by creating blog articles and communication content to support stakeholder awareness and project-related communications

Strategic Consultant Trainee *Jul 2022 – Feb 2023*

Started my professional journey in IT consulting by learning and supporting initiatives in IT Strategic Planning, IT Governance, and IT Maturity Assessment. Gained foundational knowledge of industry frameworks and methodologies, including COBIT 5, COBIT 2019, TOGAF, and ISO standards, and learned how they are applied to organizational processes and technology management.

Key Responsibilities and Contributions

- Learned the fundamentals of IT governance and maturity assessment using COBIT frameworks to understand governance practices, evaluate capabilities, and identify improvement opportunities
- Gained exposure to aligning IT initiatives with business objectives, organizational needs, and applicable Indonesian regulations
- Developed an initial understanding of TOGAF principles and the relationship between business, application, data, and technology architecture
- Learned about ISO standards and their role in establishing governance, improving processes, and supporting organizational compliance
- Built foundational skills in research, documentation, framework analysis, and understanding client requirements while collaborating with project teams

PT VADS Indonesia *Yogyakarta, Indonesia*

Jul 2020 – Jul 2022

Delivery Support, Shopee Xpress *Jul 2022*

Promoted to L3 Delivery Support for Shopee Xpress, handling complex delivery and logistics issues that could not be resolved by L1 or L2 customer support teams. Responsible for investigating delayed shipments, coordinating directly with relevant logistics operations teams, and obtaining updates to support case resolution.

Key Responsibilities and Contributions

- Analyzed order reports and investigated complex delivery delays and logistics-related issues escalated by L1 and L2 support teams
- Contacted Distribution Centers (DC), warehouses, drop points, hubs, and gateways responsible for delayed shipments to investigate order status and identify the cause of delays
- Communicated with relevant operational representatives and warehouse heads via email to obtain shipment updates, clarify issues, and confirm the status of affected orders
- Consolidated feedback from logistics operations teams and returned updated tickets to L1 or L2 agents for customer communication and further resolution
- Prepared reports on delivery issues, tracked investigation progress, and documented operational feedback to support case follow-up and resolution
- Supported the resolution of complex logistics cases through structured investigation, stakeholder coordination, and timely escalation updates

Customer Engagement Dedicated Backlog & Email, Shopee Malaysia *May 2022 – Jul 2022*

Assigned to the Dedicated Backlog & Email team supporting Shopee Malaysia, focusing on backlog management and resolving customer issues related to logistics and returns/refunds. Worked as an L2 support agent, analyzing existing cases from Excel-based reports provided by the team lead and following up with customers via email to help resolve outstanding issues.

Key Responsibilities and Contributions

- Reviewed and analyzed pending customer cases from Excel reports to identify unresolved issues and determine appropriate follow-up actions
- Investigated existing cases related to logistics and returns/refunds, assessed case details, and determined the next steps based on available information and established procedures
- Composed and sent follow-up emails to customers regarding ongoing or unresolved cases, providing relevant information and updates
- Handled escalated and backlog cases that required further analysis, working behind the scenes rather than interacting with customers through live chat
- Maintained a daily target of 30–40 email cases and underwent regular QA sampling to ensure handling accuracy and compliance with service procedures
- Used Excel-based case data to review customer issues, track case progress, and support efficient backlog clearance

Customer Engagement *Jul 2020 – May 2022*

Worked as an L1 Live Chat Customer Service Representative at Shopee (Outsource), handling customer inquiries and resolving issues related to payments, PayLater, returns and refunds, merchant transactions, and shipping logistics. Used Salesforce and internal systems to manage customer interactions, validate information, and ensure timely issue resolution.

Key Responsibilities and Contributions

- Handled 50–60 customer chats daily, providing timely responses and solutions while maintaining customer satisfaction targets
- Used the internal Knowledge Base (EKB) to ensure accurate, consistent, and policy-aligned responses to customer inquiries
- Escalated complex or unresolved cases to Level 2 (L2) support and followed up on outstanding issues to ensure appropriate resolution
- Checked and validated customer and transaction information through backend systems to support accurate case handling
- Contacted customers via email when additional information, clarification, or follow-up was required
- Worked toward weekly Customer Satisfaction (CSAT) targets and underwent regular Quality Assurance (QA) sampling to ensure compliance with service procedures and response standards

Faculty of Science and Technology, Sanata Dharma University *Yogyakarta, Indonesia*

Student Staff *Mar 2019 – Aug 2019*

Worked part-time as a Student Staff member at the Faculty of Science and Technology Secretariat, Sanata Dharma University, while completing my final-year studies. Responsible for front office support, assisting students, parents, lecturers, and visitors with administrative inquiries and secretariat-related services.

Key Responsibilities and Contributions

- Served as the first point of contact for students, parents, and visitors seeking information about faculty administration, lecturer and dean availability, schedules, and secretariat services
- Assisted with inquiries related to student attendance records, course registration (KRS), transcripts, and other academic documents
- Helped prepare and organize administrative documents, attendance forms, lecture reports, and other secretariat-related records
- Provided information and administrative assistance for internship requirements, licensing matters, scholarship applications, and ongoing faculty events or registration activities
- Coordinated inquiries and requests with relevant faculty staff to help ensure that students and visitors received appropriate information and assistance

Dinas Komunikasi dan Informatika Daerah Istimewa Yogyakarta *Yogyakarta, Indonesia*

PHP Programmer (Student Internship) *Jun 2018 – Sep 2018*

Completed an IT internship at the Department of Communication and Informatics of the Special Region of Yogyakarta (Diskominfo DIY) as part of my undergraduate study requirements. Worked onsite with the development team and participated in project meetings, progress reviews, and reporting activities. Contributed to a website development project involving a main website and 45 village office websites across Yogyakarta. The village websites were created by cloning the existing main website and adapting it for each respective village.

Key Responsibilities and Contributions

- Assisted in cloning and customizing the existing website for 45 village offices, including interface and widget adjustments using HTML and JavaScript
- Helped consolidate data from multiple districts and urban villages into a centralized dataset using SQL/SQL+
- Tested website functionality, checked interface behavior, and assisted in identifying and resolving issues
- Prepared diagrams and supporting documentation for application components and data structures
- Contributed to development progress reports and the final internship report presented to academic supervisors
- Participated in onsite meetings, progress reviews, and development activities with the project team

EDUCATION

Sanata Dharma University *Yogyakarta, Indonesia*

Bachelor of Informatics Engineering *Graduated August 2019*

Major in Computer Science; Minor in Computer Networks | GPA: 3.03/4.0

Relevant Coursework: Software Engineering, Object-Oriented Programming, Web-Based Programming, Object-Oriented Programming Practicum, Database, Database Practicum, Information Systems, Management Information Systems, Operating Systems, Computer Networks, Mobile Networks, Network Security, Internet Protocols, Network Simulation, Data Structures, Discrete Mathematics, Numerical Methods, Human-Computer Interaction, Software Design, Information Technology Project, Information Technology, IT Ethics, Entrepreneurship, and Professional Ethics

Thesis: "Estimasi Jumlah Node di Jaringan Oportunistik Menggunakan Algoritma Taxi Problem (Kasus: Jumlah Node Statis)" — The research involved network simulation using the open-source ONE Simulator (Opportunistic Network Environment Simulator) to study node-count estimation in opportunistic networks

Academic Project: RPL & PTI Project (Apr–Jul 2017) — Designed database structure for a POS system (dabhobbies.com) and collaborated with the lead developer to improve features and interface using PHP, HTML, and SQL

Activities & Societies: Honor A & A Rachmat Scholarship (2015–2016); Class Assistant for "TI Mengajar" social program (2016–2017); Public Relations, Himpunan Mahasiswa Teknik Informatika (2016–2017); Representative of HMJTI USD at Himpunan Teknik Informatika Yogyakarta (2016–2017)

CERTIFICATIONS & TRAINING

- Enterprise Design Thinking Practitioner — IBM Learning (2026)
- OWASP Overview; Container Security Training; Quality Engineering Foundation; Quality Engineering Tooling; Security Awareness Training; Governance Industry Jumpstart; Banking Industry Jumpstart — IBM Learning (2025)
- Training Documentation & Implementation of ISO 9001:2015 Standard — JQA Certification Indonesia (2025)
- Business Analyst Certificate — Udemy (2025)
